SAFETY, EFFICIENCY, QUALITY, INTEGRITY

HIGHLAND PROJECTS

HIGHLAND PROJECTS

Highland Projects is dedicated to setting a new standard in oil and gas construction and maintenance. Safety, efficiency, quality and integrity are the corner stones of our growing company. Attention to detail and customer satisfaction are always our priority. From standard projects to complex custom jobs, our team of professionals will work with you until the job is complete. We take pride in everything we do. We strive to exceed your expectations.

DIVISIONS:

- Field and Facility Construction and Maintenance
- Custom/Structural Fabrication
- Pipe Shop Facility

DEVELOPING THE FUTURE

HIGHLAND PROJECTS

PIPE SPOOL FABRICATION

In today's market increased production efficiency is required to meet project budgets. Reduced production cost equates to customer savings on every project. Shop fabricated pipe spools are known to be a link to a projects viability.

Our facility located along the high load corridor not only provides the advantage of shipping pipe spools throughout Alberta and international markets but provides the ability to fabricate large dimensional pipe modules and skids.

Advantages to pipe spool fabrication conducted in a shop atmosphere.

Controlled environment

Increased safety control reducing onsite risks

Reduced shop labour and onsite crews

Improved weld quality that is easily managed & maintained

Elimination of weather delays preventing cost overruns

Effective use of semi-automated welding equipment

Efficient on site x-ray and hydro testing with no weld faults occurring

Use of shop cranes improve handling

HIGHLAND PROJECTS

FIELD CONSTRUCTION

Highland Project's is extremely proud of the reputation we have built in our facility construction and maintenance division. We are a progressive company employing skilled individuals with extensive experience in their field. With the quality of our people and our firm commitment to safety, efficiency and integrity we are continually setting new standards.

Whether the facility is a single well tie-in plant turn around or a large plant expansion, we are ready to provide you with the highest quality service and workmanship. Over the years, we have completed many projects both large and small to the complete satisfaction of our customers. Highland's fulltime National Construction Safety Officers are another value added benefit for our customers. We maintain safety at all sites at all times.

FACILITY AND PIPELINE SERVICES:

- Project Management
- Plant Construction
- Labour Crews
- Hot Shot Service
- Maintenance Crews
- 2 Ton Picker Trucks
- Excavation
- Fabrication and installation of skid packages
- Small diameter pipeline installation
- Compressor and plant set ups
- Total lease set ups
- Separator / Dehydration and well site package installations

FIELD CONSTRUCTION INCLUDING:

(installation, commissioning, repair and maintenance of natural gas compressors)

- Oil Batteries
- Oil and gas satellites
- Multi well pad installation
- Complete B31.3 process piping, fabrication, alteration and repair
- B31/I boiler external piping
- Metering stations
- Tank farms
- Flare systems

- Line heaters
- VRU systems
- Custom fabrication of process skids or modules
- Modification of existing process equipment
- Custom structural steel fabrication
- Stairs, ladders, styles and walk way fabrication
- Separator package installation
- Dehy package work overs and installation
- Refrigeration systems
- Condenser units
- Severe sour pipe and corrosive pipe fabrication
- Small diameter steel, poly and fiberglass pipeline systems
- Repair of existing pipelines
- Pipeline pigging and gathering systems
- Below ground Y-laterals and sweep tee installation
- Electrical and instrumentation
- Internally coated pipe systems
- Hot shot service
- Picker truck service
- Field maintenance crews
- Shut down and turnaround crews
- Transportation and logistics

HIGHLAND PROJECTS

CUSTOM STRUCTURAL FABRICATION

Highland Projects prides itself on the quality of our employees. Our foremen, journeymen and welders are second to none with their firm commitment to quality and safety. That coupled with our state of the art 18,000 sq. ft fabrication shop in Sundre we are able to offer unmatched products in a timely manner.

Highlands National Construction Safety Officer's are just one of our assets when maintaining safety within all of our manufacturing processes. You can be guaranteed all of our projects are completed with safety as our #1 priority.

Self Contained Pipe Modules

Skids and Pipe Racks

Structural Fabrication - platform, walkways, handrail, custom support bases.

Rig Matting - 3 and 4 beam, treated or untreated, lifting shackles, custom widths and lengths.

In-house, Onsite Repair Work & Upgrades - Pickup and delivery available.

Pressure Work - ABSA certified, B31.1 Power Piping, B31.3 Pressure Piping, Boiler External Piping, B31.1 Stainless, Quality Management System

Warehouses and Overhead Cranes
